

Faculty Review of Open eTextbooks

The <u>California Open Educational Resources Council</u> has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextboks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Total Points: 18 out of 30

Please provide comments on any aspect of the subject matter of this textbook:

- The text is very thorough and at the same time some of the content is very thin on the topic. There are the usual links to works by Plato and Bertrand Russell, but not enough primary source material. The author relies on other commentaries about issues in philosophy as opposed to original source material.
- Subject matter is not presented in a culturally sensitive manner. The author presents his own bias concerning the existence of God with the examples of you tube videos, and his grammar also betrays his views. It would be helpful if he were just forthright with his views.

Is the textbook searchable?			Х			

Total Points: 17 out of 35

Please provide comments on any aspect of the instructional design of this textbook:

- The table of contents is conventional, but the instructional method is missing primary text, illustrations. It does have links to various websites and you tube videos, but doesn't include any contemporary films which present philosophical issues.
- More of a commentary as opposed to the students having an actual experience of doing philosophy and meeting philosophers.
