

Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](http://www.cool4ed.org) has designed and implemented a faculty review process of the free and open eTextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected no/low cost and open eTextbooks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Is the textbook searchable?					X	

Total Points: 22 out of 35 points

Please provide comments on any aspect of the subject matter of this textbook.

- I was given a link to the PDF of the text; thus, I'm not sure what ancillary materials there are.
- There is no "table of contents" in this PDF, thus, scrolling through the 600+ pages to find the chapter you're looking for isn't all that easy to use.
- There is no index or source citations in this PDF (surely these things exist somewhere?).

Editorial Aspects (25 possible points)	N/A (0 pts)	Very Weak (1pt)	Limited (2 pts)	Adequate (3pts)	Strong (4 pts)	Superior (5 pts)
Is the language of the textbook free of grammatical, spelling, usage, and typographical errors?						X
Is the textbook written in a clear, engaging style?						X
Does the textbook adhere to effective principles of design? (e.g. are pages laid out and organized to be clear and visually engaging and effective? Are colors, font, and typography consistent and unified?)		X				
Does the textbook include conventional editorial features? (e.g. a table of contents, glossary, citations and further references)		X				
How effective are multimedia elements of the textbook? (e.g. graphics, animations, audio)		X				

Total Points: 13 out of 25

Please provide comments on any aspect of the subject matter of this textbook.

There isn't any multi-media materials and the instructional goals are even a bit buried in the layout of the book.

Access (30 possible points)	N/A (0 pts)	Very Weak (1pt)	Limited (2 pts)	Adequate (3pts)	Strong (4 pts)	Superior (5 pts)
Is the textbook compatible with standard and commonly available hardware/software in college/university campus student computer labs?						X
Is the textbook accessible in a variety of different electronic formats? (e.g. .txt, .pdf, .epub, etc.)			X			
Can the textbook be printed easily?						X

Does the user interface implicitly inform the reader how to interact with and navigate the textbook?			X			
How easily can the textbook be annotated by students and instructors?		X				

Total Points: 15 out of 30

Please provide comments on any aspect of the subject matter of this textbook.

No comment.

	Not at all (0 pts)	Strong reservations (1 pt)	Limited willingness (2 pts)	Willing (3 pts)	Strongly willing (4 pts)	Enthusiastically willing (5 pts)
How willing would you be to adopt this book?				X		

Overall Comments

If you were to recommend this textbook to colleagues, what merits of the textbook would you highlight?

- The coverage of the subject matter and ease of reading are certainly highlights.

What areas of this textbook require improvement in order for it to be used in your courses?

- Table of contents, index, glossary, etc. These things help students search for specific ideas as well as helping professors to guide students to material.
